Abstract

Introduction

Output Module

Conclusion

Abstract

- SRM Student Admission Management System is basically used to manage the student admission by taking all the details from the respective student and verifying records.
- Then Allocate a student registration id so that student can easily login as well as the university side can easily identify the student details.
- Through this both student end and university end can easily know the changes done in the admission process.

Introduction

- As the name suggests, “SRM Student Admission Management System” is centered around Admission management.
- It provides both student and university end an easy management of storing data and verifying data of the particular student while admission and then allocates seat according to the rank and fee details will be displayed according to the course chosen.
- After verification process a student id will be given to the respective student and shows the details of the student in the university end.

Conclusion

- Admission Management is used widely by many of the universities and college for easy admission process and to keep the records safe.
- Both student and University end can have a glance at the management to know the status of the admission process
- This can be used in any admission process which keeps the records secure.
- This inference is easy to use and easy to understand.
- Through this admission can be easily done and one can know the status easily at any place within a point of time.
